

## Stage II:

For  $i = 1$  to # data subsets

Preform cluster analysis on subset( $i$ )

For  $j = 1$  to # output clusters

Do high misfit issues persist?

Yes

Perform cluster  
analysis on the  
contaminated  
cluster

No

Set cluster  
aside and  
increment  $j$

Once all subsets have been  
analyzed proceed to Stage III
